**The Kansas Oil & Gas Industry Presents
The Living Earth**

Science Teacher Workshop
Monday, October 13, 2008
8:30 a.m. - 4:00 p.m. (Lunch Provided)
Washburn University

The Kansas Oil & Gas Resources Fund along with industry partners have developed K-12 science teacher training. "The Living Earth" teacher workshop is designed to assist teachers & educators in providing a model for collaborative learning using earth science & energy issues.

"The Living Earth" workshop is a standards-based workshop aligned with Kansas State Department of Education K-12 science learning standards. Teachers and educators learn activities for a solid earth science and energy curriculum and receive resource materials and classroom supplies.

Topics presented by professionals from the Kansas oil and gas industry include: Earth Structure & Tectonics, Sedimentary-Igneous-Metamorphic Rocks, Minerals & Uses, Geological Time, Fossils, Soil, Water, and Energy. The interactive workshop provides hands-on experiences with lesson plans and activities. Seats are limited so register today!

Registration Form
