

KIOGA Launches New Website

The Kansas Independent Oil & Gas Association (KIOGA) is pleased to announce that the association's website www.kioga.org has been revised. The website has been redesigned as an interactive medium that keeps KIOGA members current on state and federal issues and allows public access to information about the Kansas oil and natural gas industry, energy issues, associated regulatory, natural resource, and environmental matters, and the work of KIOGA.

The revised KIOGA website embraces the modern tools for successful communication and advocacy. Our website now features online communication tools that allow KIOGA members to communicate with state and federal lawmakers directly, greatly enhancing KIOGA advocacy positions. The website also provides public information that blend messaging with content and invites interaction. Modern communication tools like blogs are incorporated into the site.

Visit www.kioga.org today! The site is still being fully developed and we continue to add data, policy briefs, and public information tools.
